

Localization

Users : <Question> Locate the region most relevant to answering the question.

MEDSAGE: The localized region is [456, 334, 505, 380].

Visual Findings

Users : <Question>, Describe the key visual findings in the localized region <Roi> relevant to the question.

MEDSAGE: Mild blunting of the left costophrenic angle is visible, with loss of its normally sharp contour.

Knowledge Grounding

Users : <Question>. <VIS>Mild blunting of the left costophrenic angle is visible, with loss of its normally sharp contour.</VIS> Based on the visual findings, summarize the relevant medical knowledge.

MEDSAGE: Blunting of a costophrenic angle reflects loss of the normally sharp pleural recess and can indicate a small amount of pleural fluid.

Reasoning

Users: Is there evidence of a pleural effusion in this image? Use the LVKC format to analyze.

MEDSAGE: <LOC>The localized region is [456, 334, 505, 380]</LOC> <VIS>Mild blunting of the left costophrenic angle is visible, with loss of its normally sharp contour.</VIS> <KNO>Blunting of a costophrenic angle reflects loss of the normally sharp pleural recess and can indicate a small amount of pleural fluid.</KNO> <CON>Yes. The findings support a small left pleural effusion.</CON>
